

The Genuine. The Original.

TRAILER RESTRAINTS

The Model RTP110R is a permanently mounted, electric mechanical restraint built for lasting performance and safety. Its rugged, zinc-plated construction stands up to harsh weather, while push-button controls, integrated sensors, and LED indicators ensure secure, reliable operation and clear communication at the dock.

Options:

- 115V 1-phase for restraint with **Standard Panel Control** (additional voltage options available upon request)
- Interlock options for both stored dock leveler lip and door position communicate to system when it is safe to operate leveler or door
- **The Combo Control Panel** provides advanced functionality with the addition of a single push button dock leveler operation control
- **The Combo Plus Control Panel** includes the single button dock leveler operation control and open/close/stop button control for door operation

1-YEAR LIMITED WARRANTY
covers parts and labor.

SAFE Features.

This powered impact restraint offers enhanced safety options via dock leveler and door interlock capabilities as well as graduating control panel options.

- Restraint: Integrated position sensors are waterproof and continuously monitor the hook's position and the presence of the Rear Impact Guard (RIG) bar. Restraint hook maintains contact with the RIG bar and automatically adjusts with trailer motion
- Traffic Communication is facilitated through inside and outside red and green LED lights, providing clear status to both truck drivers and dock personnel
- An LCD display in the control panel offers real-time system monitoring. In the event the RIG bar is not detected or engaged, an audible alarm is triggered

SMART Designs.

Eco-friendly, sustainable alternative to hydraulic systems.

- Exclusive hook position sensor means no limit switches or costly adjustments
- IP-44 rated DC gear motor protected from dirt and water spray in any direction
- Low power consumption saves on energy costs
- Unit mounts to dock wall above ground level for easy installation

SMOOTH Transitions.

Built to perform in harsh environments, it requires virtually no maintenance.

- Zinc plating provides all-weather durability
- Pulse width modulation motor control increases life of motor and mechanical parts suffer less impact damage due to integrated shock absorption
- Low-profile 9" carriage works with all standard trailers and an impact extension bar with a service range of 9" to 25"
- Easy push button operation
