4 Choose your opener

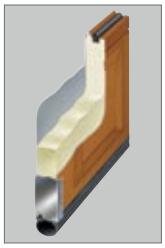

Be sure to ask about our complete line of Overhead Door® garage door openers. Powerful, quiet and durable, these garage door openers are designed for performance, safety and convenience. Your Overhead Door™ Distributor will help you choose the opener that best suits your door and preferences.

Impression Fiberglass COLLECTION®

Built Better from the Inside Out

Door construction

The Impression Fiberglass Collection® Model 7800 offers a variety of styles that capture the beauty of natural wood without the maintenance.

Foamed-in-place polyurethane insulation with a U-factor[1] of 0.20 and an R-value[2] of 11 helps control costly heat loss and gain. This type of insulation can diminish street noise and provides for quieter door operation.

Bulb-type bottom weather seal guards against wind and rain while providing a cushion when closing.

Fiberglass exterior - the beauty of wood with less maintenance.

Factory installed powder coated hardware ensures proper alignment and smoother operation with a clean interior appearance.

High cycle spring option
Choose a 25,000 cycle spring for more than twice the life of a standard torsion spring.

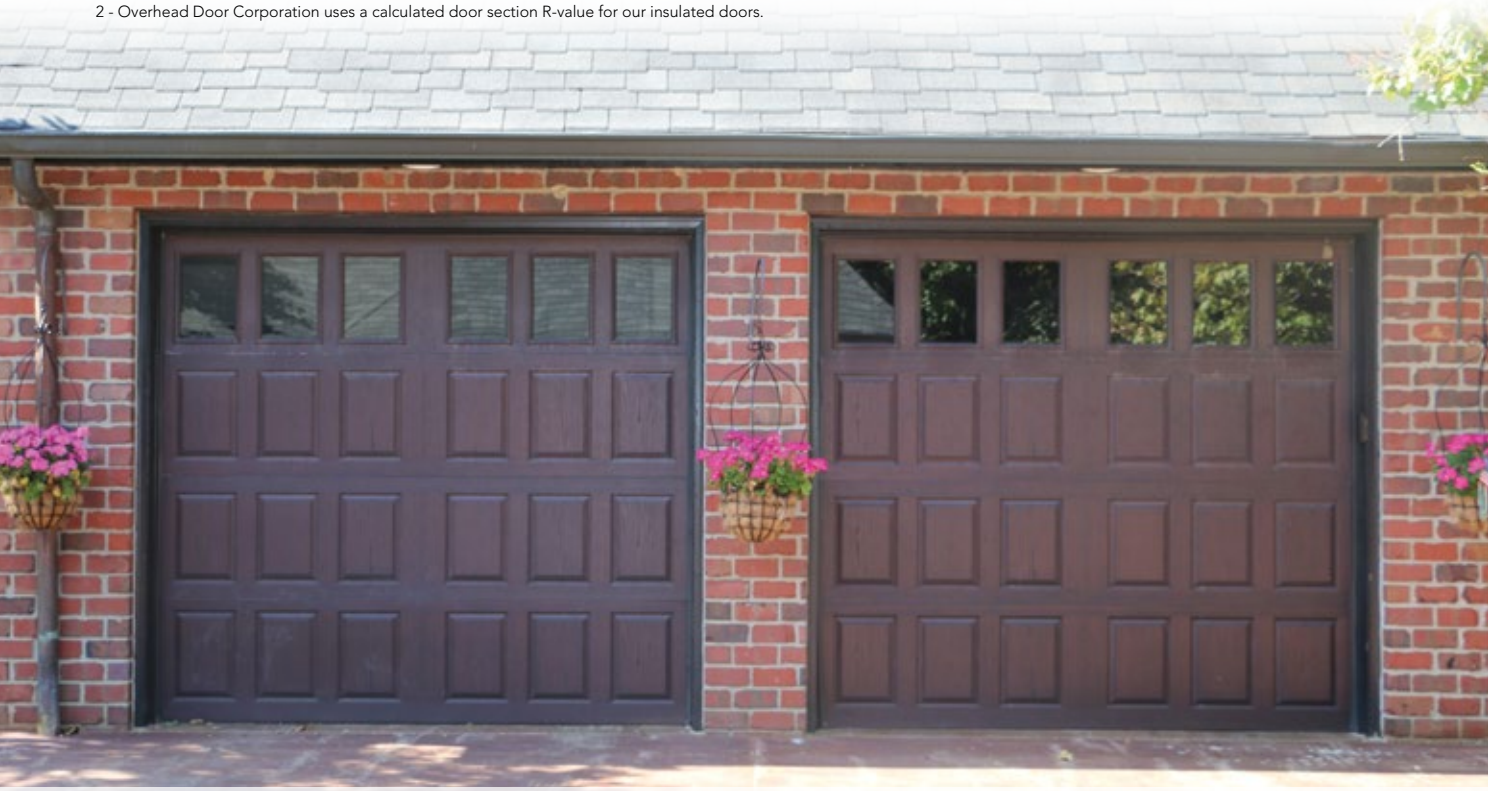

To prevent fading on exterior, water based, satin finish clear coat should be applied every 1-3 years, depending on environment. Please refer to the owner manual and Field Painting & Finishing document on **overheaddoor.com**.

DASMA Door & Access Systems Manufacturers Association International
THERMAL PERFORMANCE VERIFICATION PROGRAM
www.dasma.com/thermal

Overhead Door™ Brand participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of sectional garage doors. The lower the U-factor rating, the better the thermal performance.

Symbol indicates verified U-factor rating in accordance with the DASMA Thermal Performance Verification Program.

1 - U-Factors are based on independent testing and verified per ANSI/DASMA 105. For products other than aluminum full-view doors, testing was conducted on specific sizes of solid doors. Actual thermal performance may vary by door size and configuration.
2 - Overhead Door Corporation uses a calculated door section R-value for our insulated doors.

Vertical Raised Panel, 8' high, Walnut finish, windows
