Thermacore® COLLECTION

Premium insulated garage doors deliver maximum thermal efficiency and design flexibility.

The Genuine. The Original.

OVERHEAD DOOR®

BUILT BETTER FROM THE INSIDE OUT

Thermacore® Collection steel garage doors feature premium insulation construction and design which provides maximum thermal efficiency and reduced air infiltration for your garage space. This durable line of garage doors gives you many years of reliable operation while providing comfort and beauty to your home, even in extreme climates.

Energy-Efficient Savings

Help **control costly heat loss and gain** with our unique **Thermacore® Construction:** Foamed-in-place, CFC-free polyurethane insulation sandwiched between two layers of corrosion resistant steel helps.

Sleek and Durable

Enjoy a **clean, finished appearance inside** your garage with the **trusted strength** of the hot-dipped galvanized steel backing, complete with two coats of baked-on polyester paint.

Climate Adaptive

Our **innovative design** helps your garage door **withstand the elements** with in-between section thermal seals that achieve an air infiltration rating as low as .08 cfm.

Superior Seal

The bottom bulb-type weatherseal **guards your garage against** wind and rain and **provides a cushion** when closing for added door and floor longevity.

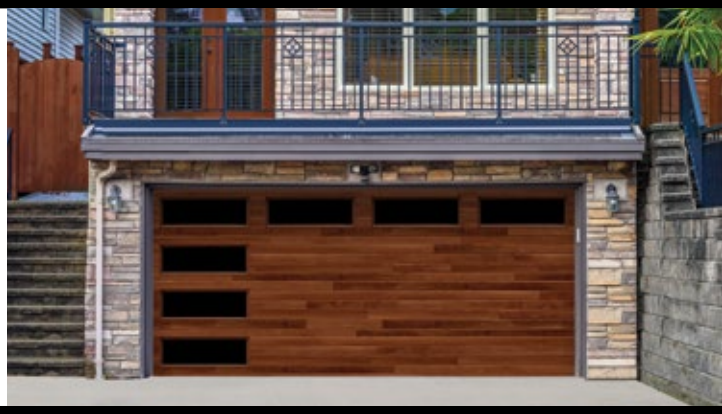
Superior Option
for Extreme Climates

Model 5760 is built to withstand the toughest conditions. With a 2″ door thickness, superior wind load capabilities, and one of the best U-factor ratings in the industry, this garage door excels in extreme climates. Whether you're facing high winds or harsh winters, the Model 5760 ensures top-tier energy efficiency and hurricane-level protection, offering you peace of mind in even the most challenging environments.

Most Popular
for its Versatility

Model 5740 offers a wide range of styles, colors, and window options, making it easy to customize the look of your home. Ideal for homeowners who want to protect their property while adding a personal touch, this model delivers both functionality and aesthetic appeal.



Best Value
in the Thermacore® Collection

Model 5720 strikes the perfect balance of quality and affordability. Designed to be durable and long-lasting, this garage door enhances the appearance of your home while delivering exceptional value for years. It's the go-to choice for homeowners seeking a dependable solution without compromising on style.

Overhead Door™ Brand participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of sectional garage doors. The lower the U-factor rating, the better the thermal performance.

1 - U-factor is independently tested and verified per ANSI/DASMA 105 using solid doors and specific product sizes.
2 - Overhead Door Corporation uses a calculated door section R-value for our insulated doors.
† See full text of warranty for details.

Model 5740 8' high, Flush panel, Artisan Wood Grain™ Black Plank finish, Clear Long windows

Model 5740 8' high, Microgroove panel, Dark Bronze finish, Narrow windows

MODEL 5760: SUPERIOR OPTION FOR EXTREME CLIMATES

Model 5760 is expertly designed to deliver **superior thermal performance and protection**, making it the perfect solution for homeowners facing extreme weather conditions.

Advanced Insulation: Featuring 2" thick Thermacore® construction, this door includes foamed-in-place, CFC-free polyurethane insulation between two layers of corrosion-resistant steel, effectively minimizing heat loss and gain.

Enhanced Air Seals: The in-between section thermal seals achieve an air infiltration rating as low as 0.08 cfm, dramatically reducing drafts and preventing unwanted outdoor air from entering your garage.

Industry-Leading Energy Efficiency: With a third-party verified U-factor of 0.10, the Model 5760 provides top-tier thermal performance, helping homeowners save on energy bills while keeping their garage comfortable year-round.

Built for Tough Conditions: Approved for Florida Building Code (FBC), the Model 5760 offers wind-load options that meet stringent standards for wind resistance. Engineered to provide hurricane-level protection, it ensures your garage remains secure and durable in the most extreme weather.

MODEL 5740: MOST POPULAR FOR ITS VERSATILITY

Model 5740 is the ideal choice for homeowners who want a garage door that **offers both style flexibility and exceptional performance**. With an extensive range of panel designs and color options, this model allows you to choose the perfect door to **match your home's architecture and curb appeal**. Additionally, window options are available to add both natural light and beauty to your garage.

Model 5740 also introduces wind load options, making it an excellent choice for homeowners in areas subject to high winds or hurricane-force conditions. FBC (Florida Building Code) approval ensures that this door can **withstand extreme weather events**, providing added protection for your home and peace of mind during storm season.

MODEL 5720: BEST VALUE IN THE THERMACORE® COLLECTION

Thermacore® Construction: Superior Insulation for Year-Round Comfort

Model 5720 offers the **perfect balance of quality, affordability, and performance**. Designed to meet the needs of homeowners looking for a durable, energy-efficient solution, this door delivers exceptional value without compromising on quality or style. Whether you're upgrading your garage door or building a new home, Model 5720 sets the standard to complement your home's exterior while providing lasting benefits for years to come.

Model 5720 features **Thermacore® Construction**, a cutting-edge design that incorporates foamed-in-place, CFC-free polyurethane insulation between two layers of corrosion-resistant steel. This advanced insulation technology is specifically engineered to help **control costly heat loss and gain**, improving the energy efficiency of your garage and reducing heating and cooling costs. The added insulation also contributes to **a quieter garage**, reducing noise from outside and from the door's operation.

To further enhance performance, Model 5720 is equipped with a bulb-type bottom weatherseal that effectively **guards against wind, rain, and debris**. This seal not only helps keep your garage protected from the elements but also provides a cushion when the door closes, reducing wear and tear on both the door and the floor. This added protection helps **extend the lifespan of your door**, ensuring it stays functional and attractive for many years.
